Sighting Tracker officially launches to the public.",Wallace, CA
```

Instructions for importing to Google Calendar:

1. Copy the CSV data above

2. Create a new text file and paste the data

3. Save the file with a .csv extension (e.g., "shark-tracker-calendar.csv")

4. Go to Google Calendar in your browser

5. Click on the gear icon (Settings) in the top right

6. Select "Import & export" from the sidebar

7. Click "Select file from your computer" and choose your CSV file

8. Select the calendar you want to add the events to

9. Click "Import"

All project milestones and phase starts will be added to your selected calendar.

Alternative Method:

You can also add these events individually to your calendar:

1. Go to Google Calendar

2. Click on the date you want to add an event to

3. Enter the event title (e.g., "MILESTONE: Design Approved")

4. Set the date and time

5. Add the description

6. Click Save

Setting up Milestone Reminders:

Consider adding reminders to each milestone event:

1. Open an event after importing

2. Click "Add notification"

3. Set reminders for:
   - 1 week before each milestone
   - 1 day before each milestone
   - Morning of each milestone

Color Coding Suggestion:

For better visibility, consider color-coding your calendar events:

- Phase Start: Blue

- Milestones: Red

- Beta Testing: Orange

- Launch: Green
